Notice on Application for World Robot Conference 2018

National societies, associations and institutes, Associations for science and technology of autonomous regions, provinces, municipalities and sub-provincial cities, Association for science and technology of Xinjiang Production and Construction Corps and other entities concerned:

Building on the success over the past three years, the World Robot Conference (WRC) 2018 is scheduled to be held on Aug. 15th-19th in Beijing, with an aim to create a communication and cooperation platform for global robotic industry and technology. High-level Forums, Exhibitions and Contests, covering industry trends and

cutting-edge technology, will jointly establish WRC as the world' s best gala for robotics.

I. Basics

WRC 2018 is scheduled to be held on Aug. 15th-19th at Beijing Etrong International Exhibition & Convention Center. The five-day event consists of Forums, Exhibitions, Contests, and Unmanned Ground System Exhibition.

The Forums will attract the presence of over 300 top experts and business leaders from the US, Russia, Germany, Japan, Canada and Korea. At the three-day Main Forum and the 20-odd thematic forums, they will compare notes on “Basic Technology and Innovation” , “Leading Trends and Exploration” , “New Applications and Practices” , “Youth Talents and Development” , and “Market Trends and Investment” .

The Exhibitions will go on for five days in three zones, dedicated respectively to industrial robots, service robots, and robot applications. They will present a

panorama of the latest achievements in AI system and robotics.

World Robot Contests (WRCC) 2018 are made up of BCI Controlled Robot Contest, Tri-Co Robot Contest, Industrial Robot Skills Contest, World Youth Design Contest, and International USV Open. Over 50,000 contestants from more than 12,000 teams in a dozen countries and regions will attend. The pioneering practices offered by the contestants will cater to the immediate needs for robotics R&D and application.

The Unmanned Ground System Exhibition will serve as an information and technology exchange platform, promoting civil-military integration, technical innovation and market competitiveness.

II. Registration

1. Visitors may register to attend the Main Forum and Exhibitions from the date of notification to Aug. 10th, 2018. Fellow entities are expected to organize their delegates to register before the deadline via WRC' s

official website (www.worldrobotconference.com) or WeChat official account.

2. Registration fees and expenses incurred by the delegates during WRC should be borne by fellow entities.
